The Post War Boom in Design

The 1950s saw a climate of optimism after the austerity of the war years. Rationing finally ended, new houses were being built and the demand for household goods was high.

Designers wanted to move away from pre-war conventions, using instead more vibrant and bolder colours and patterns, and also experimenting with new forms and materials, many first developed during the war.

All welcome!

Members £2, visitors £5, refreshments included.
